Programs; Reading Skills; School Funds

IDENTIFIERS Elementary Secondary Education Act Title I; ESEA

Title I

ABSTRACT

This application, under Title I of the Elementary and Secondary Education Act covers the following areas: "Needs Assessment," which looks at how priority needs were determined, the use of standardized tests data, and the priority needs of educationally disadvantaged children; "Project Planning," which discusses eligible attendance areas, planning effect involving other agencies and other federal programs, and children from nonpublic schools; "District Wide Parent Advisory Council," which discusses the composition and activities of the council; "Parent Participation," which looks at solicitation of parent support and dissemination of information to parents; "Objectives," which presents student objectives for sequence recognition, letter identification, oral and written vocabulary development, auditory and visual discrimination, word analysis, comprehension skills, interest and appreciation for printed materials, and attitudes and behaviors; "Procedures," which discusses testing, staffing, inservice training, and materials; "Evaluation," which looks at data collection; "Dissemination of Project Findings," which presents how information will be disseminated; and "Appendix," which includes a list of measuring instruments and results. I. Needs Assessment

- A. How priority needs were determined.
 - 1. A series of meetings and conferences was held with Title I staff, target area school principals and teachers, Parent Advisory groups, and Parent-Teacher groups. Principals of involved parochial schools and the Diocesan Elementary Supervisor were also consulted. Each group was asked to convey opinions of the most pressing needs of the educationally disadvantaged children. As might be expected the needs were many, all of them serious but without a single exception the highest priority needs were felt to be in the field of communication skills.

The Parents' Advisory Council having held a number of meetings, one in each target area school, in order to observe the current program in action came to the same conclusion. They expressed satisfaction with the existing program but asked if it were possible to expand the program vertically and horizontally so that more children could be reached.

2. Standardized test data or other evaluative data.

All children entering first grade in Lorain City schools are administered the Metropolitan Readiness Tests. In addition Delco Readiness Tests, Pre-Reading Inventories, rating scales such as the Dailey Language Facility Tests. Peabody Picture Vocabulary Tests and the Maturity Level Scale for School Entrance are all available for use and all these in various combinations helped to determine priority needs in the first grade.

For succeeding grades the results of the Iowa Tests of Basic Skills administered to all children in grades three, four and six were used. Inspection of test results from the preceeding year's Title I classes helped assess needs. These were Metropolitan Achievement Batteries, Primary Reading Profiles, Pre-Reading Inventories, Slosson Oral Reading Tests and Gates McGinitie Reading Tests. Various teacher made rating scales were also con-

sidered. Results as shown in the tables in the index and furnish additional evidence of need for assistance in the Language Arts.

- B. Priority needs of educationally disadvantaged children in order of greatest importance.
 - 1. They need concentrated instruction in the techniques and skills necessary for the improvement of written and oral language.
 - 2. They need many kinds of experiences and activities to help develop a background of the kinds of concepts and vocabulary that are necessary for success in verbal and written language.
 - 3. They need a program and/or curriculum more relevant to their interest, background, and specific needs geared realistically to their capabilities so that there might be possibilities for them to experience success and thus interrupt the pattern of constant failure and feelings of worthlessness.
 - 4. They need small group and/or individual attention, instruction and counseling to give support and encouragement which might counteract those attitudes in the home environment which impede cultural, social and educational aspirations.
 - 5. They need experiences and instruction with a wide variety of innovative materials, equipment and techniques to stimulate and hold their interest and to furnish motivation for academic achievement.
 - 6. They need concentrated effort to develop those social attitudes deemed necessary to function properly and fully in today's society along with an emotional climate which will help them develop more positive feelings about themselves.

II. Project Planning

- A. Eligible Attendance Areas.
 - 1. All elementary schools designated target area schools according to

in ing

data shown in Basic Data page 1 item 5 were included in the program.

2. This project will provide a relatively higher concentration of services to project students in the highest priority schools in the following manner:

Those schools exhibiting the highest incidence of need have been given priority in assigning teachers and scheduling classes. Additional teachers have been added in those area. Boone-Hawthorne has Title I programs in grades one through six. Charleston and Garfield Schools have three teachers each. The two schools with the lowest incidence of need, Irving and Fairhome have one teacher each. These teachers work with first and second grade level children.

B. Planning effect involving other agencies and other Federal programs and the involvement of other Federal programs.

The Title I project continues to enjoy the use of the services of the Home-School counselors in each of the Title I schools. These staff members are employed through the Dependent Pupil Program Fund. They have been of great assistance in making home contacts. They work cooperatively with Title I teachers and parents in attempting to alleviate personal problems.

Breakfast is provided every morning for all target area schools and expanded and remodeled facilities have made it possible to serve a hot lunch daily. This is provided free to children on the ADC lists and at cost to those who can afford to pay. These two programs are funded by the Child Nutrition Act.

The staff of the Bilingual school, (Title VII,) works closely with the Title I teachers in that building so that their combined planning and implementation of the program helps to supplement and enhance this unique departure in teaching.

Library books, records and filmstrips are made available through Title II are used extensively in the program. Planning meetings are held with school librarians and library clerks who work with the Title I teachers in finding and furnishing books, pictures and other pertinent materials.

Conferences have been held with 'he local Head Start director. Information and suggestions were exchanged. Members of the Head Start parent group as well as staff were invited to attend Parent Advisory Council meetings and notices are sent to them each month.

Many parents of Title I children have enrolled in the Title III Adult basic Education program. In a number of cases these parents became aware of the Adult program through their work as volunteers and/or council members in the Title I programs.

A group of interested members of the Lorain Branch of the American Association of University Women has once again assisted in Telebinocular screening tests administered to all Title I children. Children whose preliminary rough screening tests showed the possibility of visual problems were then referred to the school nurses who did more detailed and refined testing. This was followed by further referrals of those children who need further professional attention. A total of 121 children were referred to the nurses for reexamination. Of these 54 were referred to their doctors. To date glasses were prescribed and fitted for 13 children, 6 are undergoing some type of treatment and 14 were found to need no further correction.

Several meetings were held with the Catholic Diocesan Supervisor of Elementary Education so that she and her staff could share and assist in the planning and operation of the program as it affects the Catholic schools.

A number of conferences have been held with representatives of the Welfare Rights Organization, the OEO and Welfare Action Committee. Copies of Title I materials - evaluation, application, budget, etc. were furnished to them.

The project has the services of a primary resource teacher from the regular teaching staff and in the past we have been involved with Title III NDEA in the procurement of equipment.

C. Children from Non-Public Schools.

All children residing in qualified attendance areas who are enrolled in nonpublic schools and meet the selection criteria established in this project receive
the same consideration as public school children. After consultation and meeting
with the Diocesan supervisor, sister-principal and faculty members concerned at
each school the psychometrist goes into the parochial schools and administers the
Metropolitan Readiness Test to all first graders. Results of the tests are furnished to the staff and decisions concerning enrollment are made during conferences
with the first grade teacher and principal. Classes are then formed and scheduled
in accordance with the wishes and convenience of the non-public schools and a
Title I teacher is sent to meet with these classes in the non-public schools where
possible. In the event that there are not sufficient numbers of children in one
school to make up a class, the students from two closely situated schools might
be combined into one group.

- D. Does not apply.
- E. Does not apply.

III. District Wide Parent Advisory Council

A. The district-wide council is made up of 24 members all of whom are parents of children in the Title I program. Replacements have been necessary from time to time because of work schedules or moving from the target areas. These replacements are persons suggested and invited by present members. At all times membership is open to interested parents. All interested citizens are welcome to attend PAC meetings but only parents of participating children are voting members.

All Title I teachers, principals, of Title I schools, the evaluator, the coordinator as well as members of the general staff administration attend some or

all of the meetings but are not considered bona-fide members of the group.

B. Announcements were made at Parent-Teacher meetings at the target area schools, and notices were sent to parents of all Title I children concerning the formation of a Parent Advisory Council. All interested parents were encouraged to attend. In addition two parents from each Title I school were specifically asked to attend the organizational meeting so that each school would be represented. The chairman was selected by a written vote of the council members. A co-chairman was elected at the same time. Her duties were to preside at such times as the chairman could not be present and to act as secretary.

C. Eight meetings have been held prior to the time of writing. Two more will take place before the end of the grant period making a total of ten.

Plans have been made again this year for regular monthly meetings. In addition there will be a summer meeting in July when the entire group will repeat the bus trip to all schools in the summer program. They have invited the superientendent, other members of the administrative staff and school board members to accompany them. They will visit classes and will observe the swimming program. A similar trip last summer proved to be a high light and generated much favorable publicity. This experience furnishes an overview of the entire program and will, hopefully, provide a common background for more informed and detailed suggestions for future planning.

D. At each meeting the program consisted of teachers explaining and discussing various materials, procedures and programs. In addition personnel from the various supportive services such as school nurse, psychologist, speech and hearing therapist, etc. talked to the group. Council members were given the opportunity to meet with these people to ask questions, etc. They then discussed the program, made suggestions, criticisms, etc. and made a series of recommendations to be considered in planning the next year's program. Comments concerning evaluation were of necessity subjective but proved

pertinent.

Early in the existence of the Council provisions were made for submitting comments to the LEA and the SEA. All members were given the names, addresses, telephone numbers of the state Title I staff so that they could make direct contact if they desired and/or in the event that they felt their comments, advice or suggestions were not being handled to their satisfaction at the local level. All council members will have had an opportunity to see this application before the July meeting so that they can submit comments at that time.

IV. Parent Participation

- A. The Parents' Advisory Council was instrumental in setting up building committees made up of the Parents of Title I children. These groups meet at least once a month at which times they observe in the classrooms, then discuss with the teachers the materials, techniques and procedures they have seen.

 Some have work meetings at which they make games and other materials for home use with their children. After they have become familiar with the various aspects of the program they then discuss with the teachers possible changes, added areas of need, etc. At least two members of each building committee are also a member of the Parent Advisory Council. These members then bring in their building suggestions for the planning of the project.
- B. Information will be disseminated through materials presented to the district council, through the council to the building councils, at the meetings and through mailings. The meetings of the Title I teachers with group of parents as well as individual conferences will continue to serve as a means of disseminating information.

The Parent Advisory Council has a calling and mailing committee which is responsible for direct communication w. ... members. The Title I office prepares

all printed information - letters, agendas, minutes, etc. at the behest of the chairman. Each member receives a folder containing all pertinent material such as past and current applications, evaluations, ludgets as well as any materials received from state and federal resources.

- C. Meetings have already been set for next year and the same format will be followed since it has proved successful during this past year. Title I teachers will work with the groups to plan and develop programs tailored to the particular needs of their schools.
- D. The procedure decided upon for making response to complaints and suggestions of parents is as follows:

"Parents often have things to say about their children, the teachers, the program, or the principal but they do not wish to go to the school about it but might feel also to talk to another parent. Council members will receive these comments and then discuss them with the building principal and the teacher. If this does not bring a solution satisfactory to all concerned the members will bring it to the P.A.C. who will then decide on the next step to be taken and can call on any administrative member of the schools or the school board or can write to the State Title I Office for help and advice in resolving the problem."

(This material is taken directly from the minutes of the Parent Advisory Council for the June 16, 1971 meeting.)

V. Objectives

- A. The project will be directed toward effecting the following changes in student performance. The student will be expected:
 - 1. To recall the proper sequence of events in stories heard and/or read and to interpret meaning of pictures. This will be measured by one or more of:
 - a.) Metropolitan Readiness Tests Forms A & B
 - b.) Metropolitan Achievement Tests
 - Primary I Forms F & G Word Knowledge Reading
 - Primary II Forms F & 3 Reading subtests

- d.) Primary Reading Profiles Level 1
- e.) Book reports
- f.) Telling stories to class. Video taping will be used.

AST COM AMULANTE

- 2. To recognize, match and identify upper and lower case letters.

 Measured by:
 - a.) Delco Readiness Test
 - b.) Metropolitan Readiness Tests Forms A & 3
- 3. To be able to demonstrate an increased oral and written vocabulary by means of associating spoken and written words with pictures.
 - a.) Metropolitan Readiness Tests Forms A & B
 - b.) Peabody Picture Vocabulary Tests
 - c.) Open Court Correlated Language Arts
 - d.) Metropolitan Achievement Tests
 - Primary I Forms F & G
 Word Knowledge
 Reading
 - Primary II Forms F & G Reading subtests
 - e.) Lailey Language Fability Tests
- 4. To be able to demonstrate increased oral and written vocabulary by means of oral and written reports, conversation and improved comprehension.
 - a.) Metropolitan Achievement Tests
 Elementary Forms A & 5
 - b.) Gates McGinitie Reading Tests
 Forms D-1, D-2, E-1, & E-2
 - c.) Informal Reading Inventories

- d.) Book Reports
- e.) Dailey Language Facility Tests
- 5. To be able to make keen auditory and visual discrimination of rhymes; initial, final and medial sounds; long and short vowels; to identify and recognize identical sounds and words and to demonstrate use of these word and sound analysis skills in reading.
 - a.) Delco Readiness Tests
 - b.) Metropolitan Achievement Tests all levels
 subtests Word Discrimination, Word Knowledge & Reading
 - c.) Primary Reading Profiles Level I
 - d.) Pre-Reading Inventory
 - e.) Sullivan Placement Tests Books 1-21
- 6. To be able, when confronted with an unfamiliar word to apply word analysis and structural analysis in decoding.
 - a.) Metropolitan Achievement all levels
 all word analysis subtests
 - b.) Primary Reading Profiles
 - c.) Gates McGinitie Reading Tests
 Forms D-1, D-2, E-1, & E-2
 - d.) Slosson Oral Reading Test
- 7. To be able to demonstrate an increasing development of comprehension skills such as Interpretation, Understanding Sequence, Understanding Inferences, Using Context Clues, Using Word Order as Clues
 - a.) Metropolitan Achievement Tests all levels
 all reading subtests
 - b.) Primary Reading Profiles Level 1
 - c.) Gates McGinitie Reading Tests
 Forms D-1, D-2, E-1, & E-2

- d.) Gilmore Oral Reading Tests
- e.) Book Reports

∰, :

- f.) Dramatizations, puppet shows, retelling stories
- 8. To demonstrate an awareness of punctuation marks and their relationship to oral and written language.
 - a.) Metropolitan Achievement Tests

Elementary Forms A & B Language subtest Part B Intermediate Forms A & B Language subtest Part B

- 9. To show ability to work independently, to know how and where to find necessary information and to use collected information.
 - a.) Metropolitan Achievement Tests

 Intermediate Forms A & P, Language Study Skills
 - b.) Reports to class, written, oral on tape and on videotape
- 10. To demonstrate an increasing interest in and appreciation for printed materials for subject matter and for recreation.
 - a.) Library circulation records
 - b.) Teacher observation
 - c.) Reports
- 11. To exhibit improved attitudes and hehavior.
 - a.) Attendance records
 - b.) Attitude and Behavior Check Lists

VI. Procedures

- A. General Project Plan.
 - 1. Description of students.

The project's main concern will be with the young disadvantaged children with language disabilities. Their background of experiences has been so limited or so different from what is necessary for the verbal demands made by our schools

that they soon experience failure and develop a pattern of frustration and defeat early in their school lives. They tend to start school unprepared and to drop farther and farther behind unless given the kind of assistance, understanding and motivation that Title I attempts to supply.

We will be working then with children whose ages range from six to thirteen with the greatest concentration in grades one and two. There will be three classes of third graders and one each of fourth, fifth and sixth. Since their greatest weakness is in the Language Arts areas the program will be geared to this need.

2. Operating Machanics

The project will be a continuation of previous Title I projects with enrichment teachers meeting with groups of no more than six children at a time for 30 minute sessions each day of the school session to work with the children in a Language Enrichment program except for the fourth, fifth and sixth grade classes at Boone-Hawthorne. These groups will be using the High Intensity Learning Center which necessitates some variation in procedure. These three teachers will each meet twelve students at a time for a 30 minute period daily in the Center. With the assistance of a teacher aide each teacher will work individually with the children. Those children who show need for additional help will then be scheduled for a second period with the teacher in her classroom. Thus these three teachers will still be meeting 8 classes totaling forty-eight children per day with children evincing greater need receiving more intensive attention.

Each teacher will meet 8 such groups per day making a total teacher load of 48 children. There will be an employment (Fittle I) teacher for Elest grade level at all the elementary target area site is. There will also be Title I classes for the second grade level at all qualified elementary schools and three schools will have one teacher each at the third grade level.

The school exhibiting greatest need will have three additional Title I teachers, extending the program through the sixth grade. These classes will be composed mainly of children who were in preceding Title I classes during the current year

thus offering them additional reinforcement.

There will be one teacher who will meet with groups of 6 children at a time for 30 minutes at each of the non-public schools in qualified attendance areas providing there are enough children who exhibit need and meet the qualifying criteria. It will be the responsibility of the non-public school to furnish space, but equipment, materials and supplies will some from the Title I project. Travel time must be allowed thus calling for some flexibility in the number of schools which can be serviced in one day. In all probability there will be six classes per day making a total of 36 children served per day.

After the children are identified the Title I coordinator and psychometrist will interpret the results and work with the building principals, classroom teachers and Title I teachers in establishing a class schedule that coincides with sound school policy.

The enrichment teachers will work in cooperation with the regular classroom teachers at all participating schools, public and non-public. At each building they will arange for time to be spend with classroom teachers for feedback, to exchange ideas, to discuss specific problems of children involved. The greater portion of the enrichment teacher's tome will be spend working with the small groups of six children at a time situated in a designated classroom elsewhere in the school. She will use as many special instructional techniques and materials as possible. Field trips will be used extensively to provide a common background of experiences on which to base language development.

All Title I materials and equipment are kept permanently in the Title I rooms for the use of these classes.

The arrangement of schedules will be flexible to permit teachers a wide range of activities including opportunities to participate in in-service activities, work-shops, field trips, video-taping, parental participation, individual counseling and demonstrations for regular classroom teachers and Parent

Organizations.

Thirty minutes will be devoted to each class on a daily schedule and will by and large, serve the same boys and girls for the duration of the year. Children will be phased out of the program only when the classroom teacher and the enrichment teacher, using test findings, as well as subjective judgment both feel that enough progress has been achieved so that the child can successfully compete with his peers on an equitable basis. Students will be added as conditions warrant, i.e. new entrants, over-estimated ability. No new entrant will be considered unless there is room for him in the program through another child leaving and he can meet individual eligibility criteria.

3. Diagnostic Tests

A variety of diagnostic tests will be used to determine the individual needs of the students. First grade teachers use parts of the Pre-Reading Inventory for diagnosis, the Delco Readiness Test and the Delco Check Lists. They may use the Harrison Stroud tests and all make use of check lists and inventories which they develop and which accompany the different reading series they use with the various groups. The other teachers have access to and use as the need arises, the portions of the Metropolitan Achievement Tests - such as word knowledge, word analysis, comprehension, etc. which help diagnose individual needs, the Gilmore, the Gates McGinitie, the Murphy Durrell and the Primary Profiles.

Teachers involved with the High Intensity Learning Center will utilize the many diagnostic tests built into the system.

B. Selection Criteria

1. The specific criteria used to determine which students will be selected to participate are:

a.) First Grade

Those children scoring letter grades D or E on the Metropolitan Feadiness Test

b.) Second Grade

Those children who have been enrolled in first grade Title I classes and whose test stores in the Pre-Reading Inventory or other standardized tests show a deficit of 5 months or more shall be eligible.

New second grade pupils scoring in the lowest 3 stanines of the California Short Form Mental Maturity Test administered to all second grade children.

c.) Third Grade

Children who have been errolled in the second grade classes and whose test scores are still 6 months or more below grade level are automatically eligible in the third grade program.

Those children scoring one or more years below grade level on the most recently administered group achievement test may be considered eligible for new enrollment in the program.

d.) Fourth, Fifth and Sixt? Grades

Children who have been enrolled in the preceding Title I classes at some past grade and who show continued need through scoring one or more years below grade level in the Language Arts area in the most recently administered group test such as the Iowa Test of Basic Skills.

C. Staff

- 1. Staff positions fully and/or partially paid by Title I funds
- 2. Number assigned to each position
- 3. Job description of each costillon

Enrichment Teachers - 19 full wire, fully paid by Title I funds

These teachers will work 33 weeks, plus 24 hours extended time for in-service training, orientation and evaluation. Tasks as signed them will be:

To provide small group instruction in language arts.

To develop appropriate teaching materials including video tapes.

To inspect and try new materials and techniques on an experimental basis with a view to using them not only in Title I classes but to demonstrate and explain to regular classroom teachers.

To utilize diagnostic as well as achievement tests and their results so that there can be prescriptive instruction for individual children with specific problems.

To attend in-service activities and visit other systems for observation.

To plan and carry out numerous field trips.

To provide opportunities for home visitation, parent meetings and conferences and to work constructively with parent volunteers in the actual classroom operation as well as in planning.

To work with the building Parent's Committee and the P.A.C.

To confer and work with the kuilding principal, various resource personnel and regular classroom teachers in matters relating to the children in the Title I program.

To keep accurate records of attendance, test scores, progress reports and any other pertinent information about the students in their groups.

Supervisor - 1 paid 4/5 by Title I funds and 1/5 by DPP funds

The supervisor will work 42 weeks. Her duties will be to:

Coordinate facilities and services of project

Cooperate with the other administrative staff members in all matters directly associated with the program

Participate in videotape programming

Instruct and advise project staff

Organization of the Program

Set up procedures for developing curriculum

Develop parent education program

Visit classrooms and assume responsibility for supervision of project

Provide teaching materials

Develop guides and related materials

Provide in-service training for staff

Participate in Parents' Advisory Council Meetings

Duties for 1/5 time paid by DPPF:

To repervise remedial reading teachers (four) in DPPF program in the upper

e! tary and Junior High. This program is designed to complement the

Ti. I program - to carry through and extend the educational benefits developed in Title I.

Writer and Evaluator - 1 half time paid by Title I, half paid by DPPF

He will work 42 weeks. His duties will be to cooperate with supervisor in all matters directly associated with the program

Provide, distribute and schedule tests

Assume responsibilities related to all aspects of evaluation

Maintain and submit records of all testing and observations conducted during the course of the program

Direct the administration of group tests

Serve as financial coordinator

Be responsible for all records and reports

Develop and write project after consultation with all groups concerned

Coordinate evaluation of project

Duties during 1/2 time paid by DPPF - Director of DPPF

- a. Supervising DPPF project
- b. Providing materials
- c. Keeping all pertinent records
- d. Developing and writing application for DPPF project
- e. Responsibility for writing evaluation of project
- f. Responsible for financial reocrds and reports

One retired staff member to be called upon only occasionally when needed to be paid from Title I funds at the prevailing hourly rate. Duties might be:

Conducting in-service training for Leachers in the use and interpretation of various tests

Administering tests to qualified students in Title I area parochial schools on the same basis as in the public schools

Time cards will be kept and time recorded for the three aforementioned part-time staff members. In the case of the supervisor and the writer-evaluator plans are for the supervisor to spend four days per week with Title I, one day with DPP. The writer-evaluator will spend one half day in each program.

Secretary - 1 full time (12 month)

Type all necessary reports, correspondence and project data

Maintain filing system

Cooperate with staff personnel in all secretarial services
Provide duplicating service for staff

Receive and route communications

Teacher Aide - 1 full time

There will be one teacher aide who will work in the High Intensity Learning Center. She will work 30 hours per week for 38 weeks. Her duties will be to:

- 1. Assist the certificated teachers with materials in the Center
- 2. Keeping materials and equipment in order
- 3. Assisting students in finding and use of materials
- 4. Maintaining necessary files and records

D. In-service Training

In-service training for the staff carried out by specialists and teaching staff has always formed an integral phase of the Title I project and will continue to do so in the current year. Funds budgeted in this area will be used for travel expenses, registration, etc. at workshops and conferences. Any fees necessary for consultants would also come from this fund.

1. Aide - There will be no formal in-service training session for the aide since there is just the one person. She will be given on the job training by the teachers and the supervisor with whom she will work. She may attend any regularly scheduled staff meetings when it is selt that this would be of value to her and to the program.

- 2. Teachers A one day works op before the beginning of the school year. There will be an overview of the year's program, opportunities for inspection and orientation with new materials and equipment. There will also be several publishing company consultants to demonstrate and explain the use of their materials.
 - a.) There will be a workshop conducted by a specialist in the reading and/or language field.
 - b.) In-service meetings conducted by consultants from several publishing companies who have new materials that might be used in the program.

 These consultants will explain and demonstrate their materials.
 - c.) Released time for visits to other school systems engaged in Title I programs in order to see new ideas, materials and techniques.
 - d.) Released time for attendance at relevant meetings, conferences and workshops conducted by neighboring colleges, professional organizations such as IRA, Early Childhood Association, etc.
 - e.) Staff meetings at two week intervals at which there will be time to share ideas, to prepare creative instructional materials, to plan new programs and to evaluate past activites. Services of various resource people in the community will be utilized whenever it is felt that they have a contribution to make. Services of all general staff will be available home school counselors, supervisors, librarians, resource teachers, nurses, child study psychologists, etc.
- E. Equipment, Supplies, Materials and Special Facilities:

 Spaces in the identified area schools were converted for small group instruction during the FY1966 project. The areas were refurnished so that adequate equipment, lighting, ventilation and heating could be provided. The same areas have remained in use except in the case of Charleston school where a larger more adequate room was exchanged for the original one. As additional

classes were added the LEA made classrooms available at no cost to Title I.

Materials and supplies will include audio-visual devices, high quality

filmstrips, films and tapes, pre-recorded phonics tapes, prepared transparencies and videotape. These will be used to expand experiences to help build vocabulary and to upgrade reading readiness. They make it possible to individualize instruction in many ways.

Printed materials include the Fearody Kits, (Holt Rinehart) Reading Readiness, (Allyn-Bacon) Introduction to Reading, (EBF) Alphy Materials, (Follett)

I Want to Learn, Teaching English as a Second Language, Introducing English.

A large number of reading series different from the one adopted by the LEA as its basic series (Ginn 360) are made available to the Title I teachers so that they may choose the ones they feel best answer the needs of individuals and/or different groups. Among these are the Allyn and Bacon Series, American Book, Readon Publishing, Encyclopedia Britannica Series, Miami Linguistics, Lippin-cott Reading Series, Open Court, McGraw Hill Sullivan Programmed Reading Series, SRA Reading Labs, Scholastic Individualized Reading Kits, Treasure Chest, Classroom Library Packets, Creative Reading (Harper & Row) Jimminy Crickets Packets, Readers; Digest pamphlets and school editions. There are also large number of supplementary books available.

It will be necessary to replace at least one half the record players since they were acquired in 1966 and are no longer usable or repairable. The same holds true for tape recorders.

As noted above a High Intensity Learning Center has been established at Boone-Hawthorne. Many materials or hand were added to those newly purchased so that there is a good variety of materials and equipment available.

VII. Evaluation

BEST COPY AVAILABLE

A. Date Collections

- 1. Means for collecting data include:
 - a.) Group tests administered by teachers and reported to psychometrist.
 - b.) Group tests administered by the psychometrist.
 - c.) Individual tests administered by the child study office and reported to the psychometrist.

Several methods of evaluation will be employed. Objective standardized tests of general acceptance will be utilized as well as locally constructed subjective and objective instruments, teacher written check lists, observation and case studies. Informal reading inventories, book reports, and other teacher made instruments will be used.

- 2. & 3. The project will be directed toward effecting the following changes in student performance. The student will be expected:
- a.) To recall the proper sequence of events in stories heard and/or read and to interpret meaning of pictures. This will be measured by one or more of:
 - 1.) Metropolitan Readiness Tests Forms A & B
 - 2.) Metropolitan Achievement Tests Primary I
 Reading, Word Knowledge Forms F & G
 Primary II
 Reading Subtests Forms F & G
 - 3.) Pre-Reading Inventory
 - 4.) Primary Reading Profiles Level I
 - b.) To recognize, match and identify upper and lower case letters

 Measured by:
 - 1.) Delco Readiness Test
 - 2.) Metropolitan Readiness Test Forms A & B

- c.) To be able to demonstrate an increased oral and written vocabulary by means of associating spoken and written words with pictures.
 - 1.) Metropolitan Readiness Test Forms A & B
 - 2.) Peabody Pictur: Vocabulary Tests
 - 3.) Open Court Correlated Language Arts
 - 4.) Metropolitan Achievement Tests

Word Knowledge
Reading

Primary II - Forms F & G
Reading subtests

- 5.) Dailey Language Facility Tests
- d.) To be able to demonstrate increased cral and written vocabulary by means of oral and written reports, conversation and improved comprehension.
 - 1.) Metropolitan Achievement Tests

 Elementary Forms A & B

 Reading and Language Subtests
 - 2.) Gates McGinitie Reading Tests
 Forms D-1, D-2, E-1, & E-2
 Vocabulary and Comprehension Subtests
 - 3.) Lailey Language Facility Tests
- e.) To be able to make keen auditory and visual discrimination of rhymes; initial, final and medial sounds; long and short vowels; to identify and recognize identifial sounds and words to demonstrate use of these word and sound analysis skills in reading.
 - 1.) Delco Readiness Tests Word Discrimination Tests
 - 2.) Metropolitan Achievement Tests all levels subtests - Word Discrimination, Word Knowledge & Reading

- 3.) Primary Reading Profiles Level I Any or all subtests
- 4.) Pre-Reading Inventory
- 5.) Sullivan Placement Tests Books 1-21
- f.) To be able, when confronted with an unfamiliar word to apply word analysis and structural analysis in decoding.
 - 1.) Metropolitan Achievement all levels
 all word analysis subtests
 - 2.) Primary Reading Profiles Levels I & II
 - 3.) Gates McGinitie Reading Tests
 Forms D-1, D-2, E-1, & E-2
 - 4.) Slosson Cral Reading Test
- g.) To be able to demonstrate an increasing development of comprehension skills such as Interpretation, Understanding Sequence,
 Understanding Inferences, Using Context Clues, Using Word Order as
 Clues.
 - 1.) Metropolitan Achievement Tests all levels all reading subtests
 - 2.) Primary Reading Profiles Level I & II

 Reading Comprehension
 - 3.) Gates: McGinitie Reading Tests

 Forms D-1, D-2, E-1, & E-2 Comprehension subtest
 - 4.) Gilmore Oral Reading Tests
- h.) To demonstrate an awareness of punctuation marks and their relationship to oral and written language.
 - 1,) Metropolitan Achievement Tests all levels
 all language subtests
- i.) To show ability to work independently, to know how and where to find necessary information and to use collected information.
 - 1.) Metropolitan Achievement Tests

 Intermediate Forms A & B, Language Study Skills

- j.) To demonstrate an increasing interest in and appreciation for printed materials for subject matter and for recreation.
 - 1.) Library circulation records
 - 2.) Teacher observation
 - 3.) Reports
- k.) To exhibit improved attitudes and behavior.
 - 1.) Attendance Records
 - 2.) Attitude and Behavior Check Lists
- 1.) Standardized Tests available to Staff
 - 1.) Metropolitan Readiness Tests Forms A & B
 - 2.) Metropolitan Achievement Tests

Primary I - Forms F & 3

Primary II - Forms A & E, F & G

Elementary - Forms F & G - Reading Language subtests

Intermediate Forms A & P - Reading Language subtests

- 3.) Gates-McTimitie Reading Tests
 - Forms D-1, D-2, E-1, & E-2
- 4.) Stroud Heironymous Primary Reading Profiles Levels I & II
- 5.) Sullivan Placement Books 1-21
- 6.) Mckee Harrison Stroud Pre-Reading Inventory Part I & II
- 7.) Murphy Durrell Reading Readiness Analysis
- 8.) Stanford Achlemement Tests Forms J & K
- 9.) Banham Maturity Terel for Reading Readiness Checklist
- 10.) Slosson Oral Reading Tests
- 11.) Iowa Tests of Basic Skills Forms I & II
- 12.) Delco Readiness Test
- 13.) Peabody Picture Wocabulary Test
- 14.) Gilmore Oral Reading Test
- 15.) Dailey Larguage Facility Test

4. Local Instruments

a.) Kind

Attitudes and Behavior Rating Scale - a list of items relating to attitudes and behavior deemed important to the adjustment of the child to the school and academic environment. This scale was developed by the entire Title I staff after discussion and study of existing instruments. It has been restudied and revised periodically. Informal reading inventories - lists of questions which serve as checks and means of measuring comprehension.

b.) How used

After the children have been in school a sufficient amount of time for the teacher to identify their needs, attitudes and behavior (about 3 weeks), the children are rated on the 10 items on a scale. These ratings are then filed in the psychometrist's office. At the end of the year another form will be filled out for each child without reference to the first, and a comparison will be made to find whether or not there has been any change in these traits.

c.) They are designed to measure changes in the child's behavior and attitudes toward subocl. his peers and himself.

B. Data

1. Changes in scores

Most tests will be admiristered on a pre and post basis so that it can be determined whether most charge has taken place (see appendix.)

There will be comparison made with falldren and uncorps who are not enrolled in Title I classes to determine whether the methods, techniques and materials used in Title I are effective in bringing about more desired charge.

Comparison of the child's past record of progress will be made with his present rate. Follow up records of his standing in the regular classroom

are obtained through the use of a Title I constructed questionnaire to determine whether or not change consistent with the changes in his test scores has taken place.

- 2. A record will be kept of the attendance for children in the program so that it can be compared with that of children in the same school classes but not in the program, to determine changes in the attendance patterns.
- 3. Changes in behavioral patterns will be measured by the use of the attitude and behavior scales, anecdotal records kept by teachers case studies, classroom teacher and parent observations.
- C. Evaluation data from the previous year is the subject for study in the Title I staff meetings when developing and planning the next years' program. Test results have shown gains in most areas and where there are noticeable variations plans have been made to strengthen those areas through added and/or new materials and procedures. Expansion and concentration of services have been carried through as a result of study of evaluation data. When it became apparent that children returing to regular classrooms without the support of Title I quickly fell below their previous achievement the decision was made to extend the program where possible. Second grade scores for children who were in the program for their first year also have been consistently higher lending credence to the theory that these children need a longer time in a supportive program.

Many of these (those who exhibit continued need) will eventually have had support and reinforcement throughout their elementary school careers. Plans are being made to follow their records.

Readiness test scores continue to show need for compensatory education for children starting school. Limited experience with the use of the Dailey Language Facility tests emphasizes this conclusion. Consequently the smaff has begun discussion and study of the possibilities

of extending the program downward. The cornept of the pre-first grade came from such study several years ago and was adopted by the LEA so that there are now pre-first classes where need exists.

While scores and related data show small gains in some cases it is felt by the total staff that considering the background, capabilities and past performance of these Title T children, any degree of positive change is of great importance. Under ordinary circumstances and without extra help these are the children who in a year's time not only do not show any gains but instead display negative results.

VIII. Dissemination of Project Finding

Information will be disseminated through several means.

- 1. Special news bulletin, spictures and feature articles in the local daily newspaper at the beginning of the year.
- 2. Meetings at target area schools with parents and Title I teachers to explain and describe the program.
- 3. Meetings with the Parent Advisory Council and with Euilding Advisory Councils at which time all available printed information. Total State and Federal will be distributed to stimulate interest and to assist in planning.
- 4. Bulletins and reports periodically printed by the Division of Instruction and distributed to principals, supervisors and central administrative staff as well as to members of the board of education.
- 5. Reports in the LEA ki-monthly publication Curril of the News distributed to all staff.
- 6. Reports of program, new and colque materials, procedures, field tripe, etc. are given at building shart meetilings. Results of markers tests and implication of these scores for the classroom teachers are also reported.
- 7. Staff meetings, particularly at the beginning of the year, involving administrative personnel such as principals, supervisors and directors are

scheduled rescheduled regularly to spread information about effective practices throughout the school system.

- 8. Parent conferences, Parent-Teacher Meetings, and Parent Advisory Councils, Parent Building Councils.
- 9. An attractive bulletin board featuring relevant current events. This is situated in the Curriculum Center which is used by all school personnel.
- 10. Comprehensive and wide range newspaper coverage will be encouraged throughout the year.
- 11. Filmstrips and video tapes of the program in operation coupled with an oral presentation to service clubs and Parent Teacher groups.
- 12. Annual reports of all Title I activities, program and evaluation will be compiled. Copies will be distributed to administrators, staff, parent groups and all those interested.
